

PENTAIR PENTEK® WELL DEFENDER

WATER WELL SYSTEM PROTECTION AROUND-THE-CLOCK

Well water systems tend to operate as out of sight, out of mind to homeowners. However, when a home well water system fails, the sense of urgency can reach crisis levels. Pentair Pentek Well Defender helps put the homeowner in better control of this critical system by putting system status intelligence at their fingertips through a mobile app. This unique system detects issues and delivers notifications for common problems like pressure tank malfunctions, pump dry run and other situations that may impact a well water system.

ORDERING INFORMATION

Catalog Number	Description	Weight		Carton Size
		Lbs	Kg	
CSC-LINK	Pentair Pentek Well Defender	2	0.9	6" x 3.5" x 5.5"

- ◆ Transducer: 0-100psi
- ◆ Housing: Die Cast
- ◆ Cover: High-impact resin
- ◆ Enclosure: NEMA 3R Rated*

*Requires use of watertight conduit connectors

FEATURES & BENEFITS

- ◆ **Ease of installation:** Designed to retrofit in the vast majority of locations with a mechanical pressure switch. Wireless technology allows you to quickly make precise adjustments – no screws to turn. Protection all in one unit. No extra components to install.
- ◆ **Alerts for common issues:** Pentair Pro App provides mobile text or email notifications for over-current, dry run and waterlogged tank.
- ◆ **Enhances service experience and opportunities:** With your customer's permission, you can receive notifications and alerts. This can create opportunities for you as the dealer to offer additional services based on status information.
- ◆ **Sealed against infiltration:** When installed with water-tight connections, modular design helps keep out ants, bugs, and other critters.
